SUMMARY

1

INTRODUCTION

- 1.1** What is the 1st Blockchain Congress of Galicia?
- 1.2** What is blockchain?
- 1.3** Who is organising it?

1.1 | WHAT IS THE 1ST BLOCKCHAIN CONGRESS OF GALICIA?

The Official Association of Technical Telecommunications Engineers of Galicia (COETTGA), in collaboration with the Asociación Galega de Blockchain e IoT (AGALBIT) and the Asociación Galega de Graduados e Enxeñeiros Técnicos de Telecomunicacións (AGGETT), organise this technological and multicultural technological and multicultural event in which users and companies meet to receive information about certain products and technological advances.

1.1 | WHAT IS THE 1ST BLOCKCHAIN CONGRESS OF GALICIA?

In addition to technological innovations, new developments and talks at the highest academic level, we will also have a series of workshops organised by leading experts, aimed at both novice and specialised users.

We will be attended by renowned professionals of the blockchain industry that will take part in open discussion tables and will address open debate in important topics such as the regulatory framework, finance and legal development.

For two days, Santiago de Compostela will be the meeting point for the blockchain of the technological world focused on the blockchain and the future of the economy, as well as the citizen's relationship with it, touching upon various cultural and social aspects that accompany this ecosystem.

1.2

WHAT IS BLOCKCHAIN?

There are many definitions. It can be defined as a protocol transfer of value via the internet, which can be used as a means of payment for services and products, and which has a value that changes according to the basic laws of the market (supply and demand). Motivated by its global reach and the fact that it enables users to transfer value, its adoption and implementation in different sectors is growing. Therefore, blockchain is a distributed ledger on which many global technology projects, as well as the network of many cryptocurrencies. All confirmed transactions are linked together in a blockchain. In this way, the balance reflected in your e-wallet is verified.

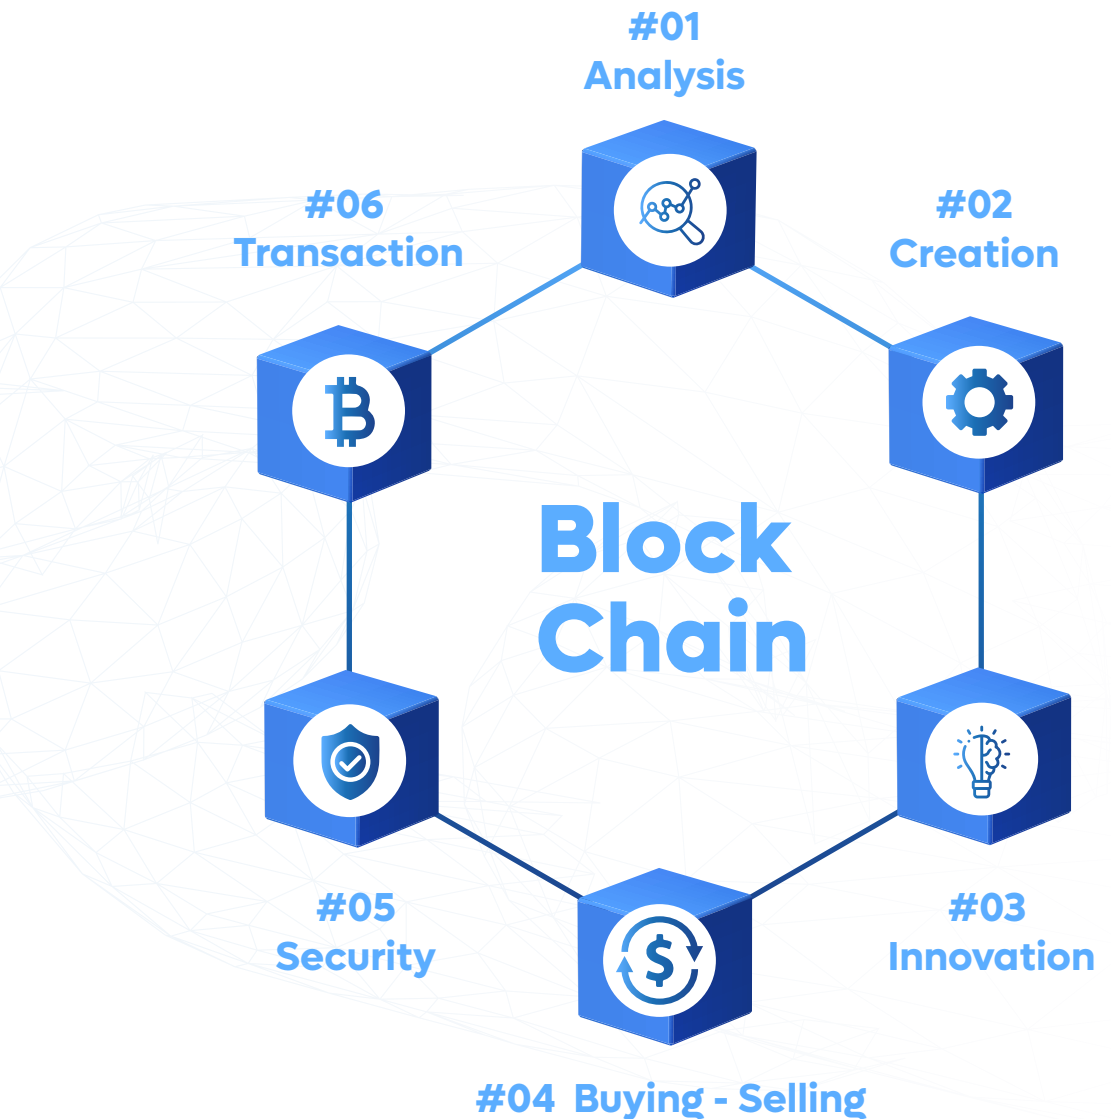

The transactions you make are also verified in this way, ensuring both collection and payment. The integrity and chronological order of the blockchain are enforced with cryptography. Transactions of value are done directly, without the need for an intermediary. Unlike most currencies, the blockchain does not need to be backed by any government or rely on the trust of any central issuer.

1.2 | WHAT IS BLOCKCHAIN?

Blockchain is a robust, distributed, tamper-proof and cryptographically secure database. The blockchain only stores the encryption code of documents, and once stored, it is saved forever.

The perfect place to store property rights, credentials, identities (of objects or persons) and agreements between parties.

1.3 | WHO ORGANISES IT?

The 1st International Blockchain Congress of Galicia BlockGalicia 2023 is organised by the Official College of Graduates and Technical Engineers of Telecommunications (COETTGA). The Association contributes to the prestige of the profession and the union of all the members of the association, and it promotes the value of the profession for the recognition of its work in companies, making possible improvements in the labour relationship.

The Association not only defends the interests of the profession, but also contributes to fostering R&D&I, to promoting the country's digital development, to disseminate Information and Telecommunications Technologies (ICT), and, above all, to improve the quality of life and sustainability, controlling energy efficiency and the environment.

1.3 WHO ORGANISES IT?

Co-organised by AGGETT

The Galician Association of Graduates and Technical Telecommunications Engineers (AGGETT) is the Galician representative of the Spanish Association of Graduates and Technical Telecommunications Engineers (AEGITT).

Its mission is to provide each associate with effective instruments that will improve their relationship with society and their professional image, promoting and disseminating information, knowledge and experience among those professionals and companies that make up the Telecommunications and Society of Telecommunications and the Information Society.

Co-organised by AGALBIT

The Galician Association of Blockchain and IoT (AGALBITT) is a non-profit association whose members aspire to promote the knowledge of blockchain and knowledge in blockchain technology and internet of things.

In addition, they are a meeting place for people with interest in the most innovative technology.

2

OBJECTIVES

2 | OBJECTIVES

The objectives of this meeting are not only to create the largest technological forum in the north of Spain, but also to open the way to a new form of communication in the north of Spain, between people, things and society, because the future is here and it is called Blockchain.

We want to make **Galicia known as a benchmark of technological progress and to be a meeting point for the blockchain community**, made up of highly qualified people with high levels of qualification, developers of the highest renown, experts in different areas and subjects and the population in general, enthusiastic about new technologies with a desire to learn and enjoy these new technological advances that are taking place in today's society to a new area of development.

Galicia

as a benchmark for technological progress

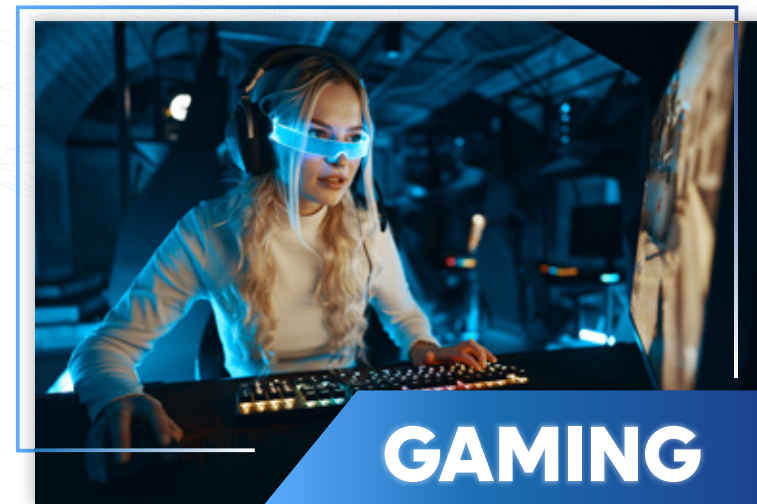

2 | OBJECTIVES

The 1st International Blockchain Congress of Galicia will bring together experts in blockchain technology, regulation and legislation, Fintech, DeFi (Decentralised Finance) and Collaborative Economy. All of them will show first-hand their experience and the different ways of applying this technology.
